ABOUT LEEF

A SUPERIOR MATERIAL

PALM LEAF,

the only intrinsically CO₂ neutral material on the market.

We borrow from nature, transforming an agricultural by-product into trendy palm leaf products that are 100% compostable.

No coating, no chemicals,
100% natural.

safe for food consumption;
free from microplastic and
harmful chemicals

natural resistance to hot,
cold, greasy, liquid or solid
food

home compostable

heat insulating

fridge, oven and microwave
safe (30 min up to 180°C,
2 min at 500W)

CO₂ neutral

fair production

LEEF®

TAKE-AWAY OCEAN PLASTIC LID LINE

- most sustainable alternative to its plastic counterparts
- combination of palm leaf plates and bowls with transparent lids made from 100% recycled ocean plastic
- aesthetically pleasing solution that sets new benchmarks in terms of functionality, sustainability and quality

**100% RECYCLED
OCEAN PLASTIC**

Our LEEF rPET lids are made of 100% recycled ocean plastic from the Pacific Ocean – thus preserving resources and energy and reducing carbon emissions. Every year, over 10 million tonnes of plastic waste ends up in our oceans –

a volume which as of now represents 75% of all total waste. This waste will take an average of 450 years to break down – it's high time for change!

OCEAN PLASTIC LID LINE

Size: 37 x 25 x 3 cm 14.57 x 9.84 x 1.18 in

Qty: 100 (4 x 25) Retail Qty: 60 (10x6)

Art.No.: CB37.000AC

Oval tray 43

Size: 43 x 29 x 3 cm 16.93 x 11.42 x 1.18 in

Qty: 100 (4 x 25) Retail Qty: 60 (10x6)

Art.No.: CB43.000AC

LEEF®

RETAIL OPTIONS

THE MUST-HAVE ITEMS FOR CELEBRATIONS AND EVENTS

GOOD FOR THE CUSTOMER

- product line specifically designed for use at home
- sustainable all-rounder for all types of occasions, from formal celebrations to parties, BBQs, camping, or children's birthdays
- available in compostable packaging as a zero carbon & zero plastic product

GOOD FOR THE RETAILER

- Signature line also available in display boxes for sale in shelves (60cm depth) and promotional quarter pallet displays (35 cm depth)
- available in retail packing units of 6 pcs. Individual PUs on request
- white label branding possible
- highest certification level in the market, socially responsibly produced
- seasonal and additional household products available
- various shrink packaging materials available (e.g. compostable foil)
- reliable delivery & highest quality thanks to independent double quality checking

BBQ SET

BBQ set

6 plates, 6 forks, 6 knives

Size: 20 x 20 x 5 cm 7.87 x 7.87 x 1.97 in

Art.No.: GN20.000AC Qty: 60 (10 x 6)

All-purpose tray, small

Vol.: 130 ml	4.4 oz
Size: 18 x 10 x 2 cm	7.09 x 3.94 x 0.79 in
Art.No.: BE17.610	Qty: 60 (10 x 6)

All-purpose tray, medium

Vol.: 150 ml	5.07 oz
Size: 17 x 12 x 2 cm	6.69 x 4.72 x 0.79 in
Art.No.: BE18.615	Qty: 60 (10 x 6)

All-purpose tray, large

Vol.: 200 ml	6.76 oz
Size: 21 x 14 x 2 cm	8.27 x 5.51 x 0.79 in
Art.No.: BE22.610	Qty: 60 (10 x 6)

CUSTOMIZED PRODUCTS ON REQUEST

- custom packing units possible
- carton dimensions and size customizable
- customized labels on request

Embossed

- no additional cost per piece
- requires individual tooling
- best for large volumes

Branded (burn marked)

- small additional cost per piece
- no individual tooling required besides branding iron
- best for medium volumes

Lasered

- high additional cost per piece
- no individual tooling required
- good for detailed artwork
- best for small volumes

Food safety

FSSC 22000, Food Safety System Certification

This certification states the compliance of our manufacturing facilities to the renowned International Featured Standards (IFS Food) of the Global Food Safety Initiative (GFSI).

It guarantees product safety and monitors the entire supply chain closely. FSSC 22000 (5.1) and BRC (Global Standard for Food Safety) are the most important food safety standards worldwide.

Food compatibility

LFGB certification

The LFGB certifies that the laboratory tests also meet FDA standards.

It proves the suitability for food contact: There is no transfer of substances from the packaging material into the food. The products are free of toxic substances that can cause harmful effects on human health.

Composting

DIN 9P0064, home compostable, DIN CERTCO

This certification provides credible and verifiable proof that palm leaf is a safe material for home and garden composting.

compostable
7P0602

DIN 13432 industrial compostable, DIN CERTCO

Biodegradable products that decompose completely within 3 months.

Ecotoxicity tests verify that the resulting compost has no negative effects on plant growth.

Emissions

Planetty certified carbon neutral production and company

Emission-neutral production and offset emissions in logistics operations through environmental projects in India, Borneo and the Netherlands.

Production

SA8000 standard for fair and ethical production

SA8000 guarantees a safe and healthy work environment with no child or forced labor. It assures standards on working hours, adequate wages, freedom of association etc. It is controlled twice a year by unannounced visits.

Recycled Ocean Plastic

rPET certification

The Ocean Bound Plastic Certification encourages the removal of Ocean Bound Plastic from the environment and asserts the origin of OBP waste from the first collection point. It guarantees the traceability of recycled OBP waste until a new product is created.

Uncoated Paper

FSC certification

The FSC certification guarantees that only wood from sustainable timber industry is used and that logged areas are afforested with new trees.

WHY PALM LEAF IS SUPERIOR TO PAPER, BAGASSE AND OTHER COMPOSTABLE MATERIALS

- Palm leaves are the most elegant and sustainable material solution on the market. The natural texture of the palm leaf has an exceptional look and feel; each product comes with a unique natural design.
- The leaves are an agricultural by-product of Areca nut farming. There is no sourcing of virgin raw materials.
- Our leaves remain untreated and are therefore suitable for industrial and domestic composting (no coating, zero chemicals or pesticides).

- Thanks to the simple collection and immediate use of the raw material, the production process has very low energy consumption and use of resources. In comparison, the production of plastics, bioplastics, paper and bagasse requires the use of harmful chemicals and is extremely CO₂ intensive.

- Transport emissions are kept to a minimum compared to bagasse or paper "eco-products" that travel many times around the world from raw material to end product.

WHY LEEF?

- LEEF combines Asian tradition with German quality management and modern efficient processes to achieve a perfect product and service
- globally represented through LEEF Blattwerk GmbH in Germany, LEEF Latin America S.A. in Panama and LEEF Products in India
- the palm leaf material expert and pioneer with 10 years of experience
- several quality controls and additional steps are established in the production chain
- the largest palm leaf product portfolio in Europe and continuous new developments
- high production capacities
- fair and ethical production. e.g. LEEF is not cooperating with palm oil and monoculture plantations
- empowering more than 500 female workers involved in our cluster production spread over several villages

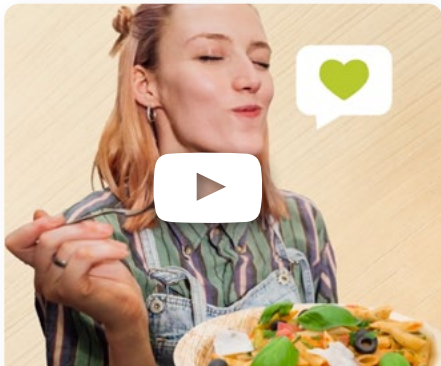

WHY NOW?

- CO₂ neutral and plastic-free alternatives and solutions are needed due to climate change and environmental pollution; this is not a matter of trends or markets.
- Materials like plastic, paper, bagasse and aluminium are too CO₂ intensive to produce and recycle. The constantly rising prices for CO₂ offsetting will affect such products. As a natively carbon neutral material, palm leaf is not affected by this trend.
- Countries around the world are currently in the process of restricting single use plastics and harmful chemicals like PFAS used for bagasse and paper. Being free of all chemicals and garden compostable, palm leaf is not affected by such restrictions.
- Since 03.07.2021, the sale of single use plastic plates has been prohibited in the EU for products imported after this date.
